GFPS MBH IN AACHEN

GESELLSCHAFT FÜR PRODUKTIONSHYGIENE
UND STERILITÄTSSICHERUNG MBH

GfPS mbH is a second-generation family business and has been managed by me since 2010.

Our clear vision is to contribute our expertise to the development of analytical methods and solutions for the medical device industry.

To date, we can look back on a history of over 30 years of successful projects and satisfied customers.

The founding of GfPS mbH for laboratory technology solutions in the field of analysis for medical devices was the result of Rüdiger Dietz's many years of experience and passion.

GFPS MBH

As a leading institute for the analysis of medical devices and their packaging, we are committed to providing accredited and certified services of the highest quality and in accordance with standards.

In addition, we work continuously to improve the analysis of medical devices and thus patient safety in the long term.

Thanks to our many years of experience and our in-depth understanding of the industry, we make a significant contribution to healthcare.

ACCREDITED ANALYTICS, CLEAN ROOM QUALIFICA- TION, PACKAGING TESTING, TRANSPORT SIMULATION AND SEMINARS

We are a DAkkS-accredited, GMP-certified institute in Aachen and specialize in the biological, microbiological and physical testing and analysis of medical devices, pharmaceutical products, cosmetics and healthcare premises.

We are your reliable partner for supporting your production line and research and development projects. We offer you our expertise in the field of biological and microbiological laboratory analysis, measurement technology in cleanrooms, physical and microbiological packaging tests, as well as transport simulation and comprehensive hygiene support. In addition to various standard-compliant tests, we create individual solution concepts for your specific issues.

As a testing laboratory, we have DIN EN ISO 17025 competence in the field of medical devices and are GMP-certified. In accordance with § 14 (4) of the German Medicinal Products Act (AMG), we are qualified to carry out microbiological analyses and thereby fulfill the requirements of the EC guidelines on good manufacturing practice for medicinal products.
